

## Infirmiry Health Adopts Omnicell's Sterile Compounding Solutions and Services

March 14, 2018

### Comprehensive turnkey solution supports safer, more cost-effective and efficient production of IVs

MOUNTAIN VIEW, Calif., March 14, 2018 /PRNewswire/ -- Omnicell, Inc. (NASDAQ: OMCL) today announced that Infirmiry Health, a five-hospital health system in Alabama, has chosen Omnicell® IV solutions to support their sterile compounding operation, helping enhance patient safety and reduce pharmacy outsourcing costs. Infirmiry Health will be implementing three [i.v.STATION™](#) Non-hazardous Compounding Robots and Omnicell's new [IVX Workflow](#) technology, part of the Company's industry-leading medication management automation platform, in four hospitals across the health system. Additionally, the system will leverage Omnicell's [Robotic IV Insourcing Solution](#) (RIIS™), a comprehensive, turnkey approach to insourcing the hospital's sterile compounding.

IV medication safety is a top priority for many hospital leaders, who are working to mitigate safety concerns associated with sterile compounding. According to *Pharmacy Purchasing & Products'* State of Pharmacy Compounding 2017, 44 percent of healthcare facilities expect to see an increase in in-house compounding volumes over the next three years.<sup>1</sup>

Seeking opportunities to enhance outcomes and achieve greater efficiencies led Infirmiry Health to identify Omnicell's robotics and workflow automation solutions to achieve operational goals while enhancing patient safety. The health system will implement these technologies later this year.

Through RIIS, a partnership that combines advanced robotic technology, data, and expertly trained pharmacy technician support staff, the pharmacy gains the tools and resources needed to create a safer, more accurate and ultimately more cost-effective IV compounding operation.

"Leveraging IV robotics and workflow solutions will enhance patient safety and improve efficiency across our facilities," said Lee Ann Cain, RPh, vice president, Pharmacy Services, Infirmiry Health. "As a strategic partner in this systemwide initiative, Omnicell provides continual support to help us achieve our key performance goals."

"Automating sterile compounding will help Infirmiry Health's efforts in creating a safer, more accurate and most cost-effective IV pharmacy," said Douglas Descalzi, vice president and general manager of IV Solutions at Omnicell. "We look forward to continued partnership to enhance control, efficiency and outcomes."

#### About Infirmiry Health

Infirmiry Health is the largest non-governmental health care system in the state of Alabama. It serves an 11-county area of south Alabama and north Escambia County, Florida, with 700 active physicians on the medical staff and more than 5,600 employees. Infirmiry Health is composed of five acute care hospitals, three post-acute facilities, a physician clinic network with more than 30 locations, six diagnostic imaging centers, two full service breast centers and a freestanding emergency department, along with other affiliated entities.

#### About Omnicell

Since 1992, Omnicell (NASDAQ: OMCL) has been inspired to create safer and more efficient ways to manage medications and supplies across all care settings. Omnicell is revolutionizing the patient medication experience from hospital to home by empowering providers to keep each patient at the center of care. The Company's autonomous approach to medication management leverages a differentiated platform for hardware and workflow software solutions, real-time predictive intelligence, and performance-driven partnerships to help drive operational, financial, and clinical success for customers.

Supporting the highest level of patient safety is essential to excellent patient care. As a leader in medication and supply dispensing automation, central pharmacy automation, IV robotics, analytics software, and medication adherence and packaging systems, Omnicell is focused on delivering solutions for medication availability, affordability, safety, and adherence. Over 4,000 customers worldwide use Omnicell® automation and analytics solutions to increase operational efficiency, reduce medication errors, deliver actionable intelligence, and improve patient safety.

OmniceIl's innovative medication adherence solutions, used by over 32,000 institutional and retail pharmacies in North America and the United Kingdom, are designed to improve patient engagement and adherence to prescriptions, helping to reduce costly hospital readmissions.
