

Omnicell Exhibits Industry-Leading Platform with Suite of Automated Supply and Medication Management Solutions at AHRMM18

August 9, 2018

Company Hosts Reception at AHRMM Booth Exploring How Technology Helps to Increase Safety and Efficiency, While Lowering Costs

MOUNTAIN VIEW, Calif., Aug. 9, 2018 /PRNewswire/ -- Omnicell, Inc. (NASDAQ: OMCL), a leading provider of medication and supply management solutions for healthcare systems, today announced it is exhibiting its leading edge supply chain solutions at the Association for Healthcare Resources & Materials Management (AHRMM) [Conference & Exhibition](#), taking place from August 13-15, 2018 in Chicago.

Manual, disjointed supply and medication management processes are time-consuming, affecting inventory costs and revenue, and ultimately patient safety. As medical supplies account for 30 to 40 percent of a hospital's total costs,ⁱ hospital supply chain leaders need a better, more efficient way to manage these resources—particularly as today's health systems become more expansive and complex. Omnicell's automated supply and medication management solutions help to increase materials management efficiency, lower inventory costs, and reduce stock outs that impact patient care.

To further advance discussion about best practices and reporting technology, the company is hosting a reception on **Monday, August 13 from 4:00-6:00 p.m. in Booth #213**. Rupert Robin, senior director of Research and Development for Omnicell, is leading a discussion on the importance of a unified platform and cloud-enabled reporting for hospitals and health systems. With an extensive background in supply and medication management automation, Mr. Robin will help supply chain leaders understand how to leverage automation to effectively control costs, capture charges for reimbursement, and improve the reporting process.

"Hospitals are constantly looking to improve patient care. Optimizing visibility to the supply chain ultimately helps ensure the right materials are where they should be to provide the best, most efficient care to patients," said Rupert Robin. "We've been listening to our customers and are excited to be focusing on how our latest solutions can help improve their supply processes through innovative, web-based solutions with real-time data."

About Omnicell

Since 1992, Omnicell (NASDAQ: OMCL) has been inspired to create safer and more efficient ways to manage medications and supplies across all care settings. Omnicell is revolutionizing the patient medication experience from hospital to home by empowering providers to keep each patient at the center of care. The Company's autonomous approach to medication and supply management leverages a differentiated platform for hardware and workflow software solutions, real-time predictive intelligence, and performance-driven partnerships to help drive operational, financial, and clinical success for customers.

Supporting the highest level of patient safety is essential to excellent patient care. As a leader in medication and supply dispensing automation, central pharmacy automation, IV robotics, analytics software, and medication adherence and packaging systems, Omnicell is focused on delivering solutions for medication availability, affordability, safety, and adherence. Over 4,500 facilities worldwide use Omnicell[®] automation and analytics solutions to increase operational efficiency, reduce medication errors, deliver actionable intelligence, and improve patient safety.

Omnicell's innovative medication adherence solutions, used by over 32,000 institutional and retail pharmacies in North America and the United Kingdom, are designed to improve patient engagement and adherence to prescriptions, helping to reduce costly hospital readmissions.
