

## OmniceLL's EnliveHealth™ Reports Strong Customer Demand for New SaaS Technology Solution to Help Pharmacies Meet COVID-19 Vaccination Challenges

January 11, 2021

CareScheduler Automates Vaccine Scheduling, Consent Collection, Registry Reporting and Patient Outreach; Enables Pharmacies to Efficiently Administer COVID-19 Vaccine

MOUNTAIN VIEW, Calif.--(BUSINESS WIRE)--Jan. 11, 2021-- Omnicell, Inc., (Nasdaq:OMCL), a leading provider of medication management solutions and adherence tools for health systems and pharmacies, today announced strong market demand for its new CareScheduler digital solution that enables pharmacies to efficiently and effectively manage administration of the COVID-19 vaccine. CareScheduler was developed by EnliveHealth™, the Omnicell division that provides patient engagement and communications technology solutions for retail pharmacies and health plans.

[CareScheduler](#) is a software as a service (SaaS) technology solution that automates traditionally manual and paper-based processes, empowering pharmacies to keep their patients and staff healthy and safe during the pandemic while helping to drive increased script growth and improved profitability. The exclusive new tool uses advanced digital technologies, data sciences, and communications capabilities to enable hands-free scheduling, vaccine registry reporting, and patient outreach for the administration of vaccines and other point-of-care services. Integrated into EnliveHealth's industry-leading Patient Engagement Platform, CareScheduler automates the collection of consent and vaccine administration records without patients having to handle documents in the pharmacy.

EnliveHealth™ is currently in advanced discussions with more than 50 major pharmacy chains that have expressed strong interest in acquiring the new CareScheduler solution. In fact, pharmacy companies representing nearly 1,000 stores nationwide have already signed up for the exclusive new CareScheduler digital tool.

"As trusted healthcare providers, community pharmacies like ours are on the frontlines of ensuring that patients receive the COVID-19 vaccine as expeditiously and safely as possible," said Duane Jones, BS Pharm, pharmacy district manager and clinical program director at Harps Food Stores. "CareScheduler is an important digital tool that helps us to efficiently manage and streamline the administration of the COVID-19 vaccine. By partnering with EnliveHealth™ on CareScheduler and other technology innovations Harps Foods can continue to drive practice transformation and focus on value-added services that directly impact patient health outcomes, satisfaction, and retention."

"COVID-19 has placed significant new demands on retail pharmacies, and I am excited that our new division EnliveHealth™ is purpose-built to help pharmacists manage major challenges like this," said Scott Seidelmann, executive vice president and chief commercial officer of Omnicell. "Omnicell's mission is to be the pharmacist's most trusted partner, and we achieve that by building and providing transformative digital solutions and technology-enabled services. EnliveHealth's new CareScheduler solution exemplifies this strategy in action. We are very pleased that the market has responded positively to it."

"Pharmacists are the new frontline healthcare heroes who can and must play an essential role in administering the COVID-19 vaccine and make it a success for all Americans," said Danny Sanchez, vice president and general manager of EnliveHealth™. "However, to achieve that critical goal, pharmacies and pharmacists must have the right technologies to empower them to handle the huge administrative and operational challenges of vaccinating up to 330 million Americans in a timely fashion. With CareScheduler, we are giving pharmacies the tools and support they need to handle the expected increase in patient demand and pharmacy store traffic once the COVID-19 vaccine becomes universally available."

### About Omnicell

Since 1992, Omnicell has been committed to transforming the pharmacy care delivery model to dramatically improve outcomes and lower costs. Through the vision of the Autonomous Pharmacy, a combination of automation, intelligence, and technology-enabled services, powered by a cloud data platform, Omnicell supports more efficient ways to manage medications across all care settings. Over 7,000 facilities worldwide use Omnicell automation and analytics solutions to help increase operational efficiency, reduce medication errors, deliver actionable intelligence, and improve patient safety. More than 50,000 institutional and retail pharmacies across North America and the United Kingdom leverage Omnicell's innovative medication adherence and population health solutions, which provide proven patient engagement and communications solutions that enable retail pharmacies and health plans to significantly improve medication management, adherence, and safety for their patient and member populations.
